Section I: General Information

A. Introduction

This Request for Qualifications (“RFQ”) is the first phase of a two-phase procurement process as set forth in MGL Chapter 149A. The University of Massachusetts Building Authority (UMBA) through its Trade Contractor Prequalification Committee is prequalifying firms interested in providing public Trade Contractor services on this Public Construction Manager at Risk (“CM” or “CM at Risk”) project through this RFQ process. UMBA will evaluate submitted Statements of Qualifications (“SOQ”) based upon the identified evaluation criteria and points set forth in Section VI below and only those firms obtaining the required minimum points will be deemed prequalified. Only those respondents deemed prequalified will be invited to submit a bid in response to a Request for Bids (“RFB”) which will be issued in the second phase of the procurement process. The project delivery method for construction will be public CM at Risk with a Guaranteed Maximum Price (“GMP”) under M.G.L. Chapter 149A.

B. General Project Information

Awarding Authority:	University of Massachusetts Building Authority (UMBA)
Project Number:	UMBA 15-L1
Project Name:	Fox Hall Elevator Addition and Modernization
Project Location:	University of Massachusetts - Lowell
Project Description:	The Fox Hall dormitory provides housing for over 800 students. Fox Hall was originally constructed in the early 1970's and has since had numerous renovations. The building is 18 stories with a partial basement and is for the most part, a post-tensioned concrete building. There are some portions on the lower floors that are steel-framed with concrete-topped, metal decking. The exterior walls are clad with concrete panels except at the three vertical masonry cores that contain the stairs, elevators, and mechanical and electrical shafts and equipment. The two existing primary Fox Hall elevators are original to the building and were designed to support

	420 residents. In addition to being at risk for maintenance failure from the aging equipment, they do not meet the demand of the current resident count of over 800. The two existing elevators are to be modernized and a new 18-story tower addition is to be constructed to house two new elevators with elevator lobbies.
